Choose from one of two NEW barless provisional options

BARZERO

EXPRESS

Immediate Screw-Retained Milled PMMA Provisional

Faster, more durable immediate conversions for your patients

- Ideal for day-of-surgery conversions
- “Trough” design picks up copings intra-orally then secures them with acrylic
- Install restoration in about an hour
- Improved strength over traditional options
- Significantly reduce repair incidents, with >95% success rate during our beta testing program
- Improved aesthetics & patient satisfaction
- Available with a palate and flanges if desired

BARZERO

LTP

Long Term Screw-Retained Milled PMMA Provisional

Durable Monolithic PMMA barless restoration provides excellent value

- Ideal interim prosthesis to temporize the patient during osseointegration
- Arrives complete and ready to install
- Improved strength over traditional options
- Monolithic design reduces repair incidents
- Improved aesthetics & patient satisfaction
